Akber Ghori

Data Engineer
- Years Experience: 0-1

Education / Trainings
- B.S in Business Information Technology from Virginia Polytechnic and State Institute in May 2018
- Hands on experience in SQL using Oracle SQL Developer and HIVE
- Completed Wipro Hadoop training

Areas of Expertise
- SQL
- Snowflake
- Alteryx
- Tableau

Experience and Accomplishments

University Business IT Showcase

- Worked as the data analyst on an application to use OCR conversion on resumes and upload the results to then be turned into data for use in Tableau visualizations
- Created 5 diverse Tableau visualizations for use by recruiters

Ingersoll Rand Internship:

- Used Alteryx, Tableau, and SQL for various business critical projects in data anomaly detection, data validation, and error tracking
- Created VBA applications and Alteryx models that can be reused for multiple business purposes after initial projects were complete
- Developed SQL queries for data collection in Oracle and Hadoop environments for use in data validation daily

Wipro Ascent Program

- Two week intensive Cloudera/Hadoop training encompassing use of Map Reduce, Scala, Spark, Hive and HUE
- Two week SQL course encompassing DDL and DML commands as well as RDBMS concepts using Oracle
- One week course for Python, Tableau, and Snowflake consisting of introductory usability and core concepts
- Developing an HR recruitment tool using Python for converting PDF files into text and extracting key fields to be executed in a cross platform GUI
